

# Angelo Reychie A. Alejo

## Full-Stack Developer

Cagayan de Oro City, Philippines | +63 928 902 4953 | [alejo.angeloireychie@gmail.com](mailto:alejo.angeloireychie@gmail.com)  
[github.com/Reychie](https://github.com/Reychie) | [angelo-reychie-portfolio.vercel.app](https://angelo-reychie-portfolio.vercel.app) | [linkedin.com/in/angelo-reychie-alejo-41970225b/](https://linkedin.com/in/angelo-reychie-alejo-41970225b/)

Full-stack developer with production experience building and maintaining healthcare software for a US-based company. Works across React/Next.js frontends, REST APIs, relational databases, and access controls, with PHP project experience. Uses AI development tools to support implementation and debugging.

## WORK EXPERIENCE

---

### Full-Stack Developer

Pontiac, Michigan, USA

#### Compassionate Home Health Services

Dec 2025 - Sep 2026

- Delivered healthcare application features from business requirements through implementation and deployment using TypeScript, Next.js, Node.js, Python, Supabase, and Vercel.
- Implemented REST APIs, database workflows, authentication, and role-based permissions to support internal dashboards, workflow automation, and business processes.
- Integrated third-party APIs and AI features, including Google Calendar synchronization, secure data retrieval, and function calling.
- Tested application workflows and data behavior, debugged frontend and backend issues, and collaborated with developers to resolve production defects.
- Built AI-assisted development tools with isolated testing environments and real-time previews; used Cursor, Claude, and Codex to support development.

## SKILLS AND TOOLS

---

**Programming Languages:** TypeScript, PHP, JavaScript, Python, SQL, C++, Java

**Frontend:** React, Next.js, HTML, CSS, Tailwind CSS, React Native, Vite

**Backend and APIs:** Node.js, Express.js, REST APIs, Socket.IO, third-party integrations

**Databases:** PostgreSQL, MySQL, Supabase, MongoDB, vector databases

**AI and Machine Learning:** OpenAI API, Gemini API, AI agents, function calling, predictive analytics

**Security:** Authentication, authorization, role-based access control (RBAC), row-level security

**Tools and Cloud:** Git, GitHub, Postman, Vercel, VS Code, Cursor, Claude, Codex

## PROJECTS

---

### NE-Attend

2024 - 2025

*Full-Stack Developer | MongoDB, Express.js, React, Node.js, Socket.IO, Chrome extension*

Built a Google Meet attendance platform with participant verification, real-time attendance monitoring, late and absence tracking, and session history.

### USEAPP

2025

*Full-Stack Developer | React, PHP, Socket.IO*

Developed a real-time attendance and payroll system using React and PHP, with a connected mobile application for synchronized time records.

### Credit Card Fraud Detection

2025

*Machine Learning Project | Python*

Trained and evaluated logistic regression, random forest, and support vector machine (SVM) models to classify fraudulent transactions and compare performance.

## EDUCATION

---

**University of Science and Technology of Southern Philippines - Cagayan de Oro**

*Bachelor of Science in Information Technology*

2026

Dean's List: Academic Years 2022-2023 and 2023-2024
